PROFESSIONAL SUMMARY

Results-driven Software Engineer and 2025 B.Tech Computer Science graduate with hands-on experience in Java, Spring Boot, REST API development, and full-stack web applications. Proficient in MySQL database management, OOP design, and building scalable CRUD-based backend systems. Proven ability to deliver end-to-end projects using modern technologies including ReactJS, HTML, CSS, and JavaScript. Seeking an entry-level Software Engineer role to apply strong technical foundation and project experience.

TECHNICAL SKILLS

Programming Languages: Java, SQL

Backend Technologies: Spring Boot, REST API, Microservices (Basics)

Frontend / Web Technologies: HTML5, CSS3, JavaScript (ES6+), ReactJS

Database Management: MySQL, JDBC, SQL Queries, Joins, Aggregate Functions

Core Java Concepts: OOP (Inheritance, Polymorphism, Abstraction, Encapsulation), Collections Framework, Exception Handling, Multithreading

System & Platform Knowledge: Linux/UNIX Basics, Command Line

Tools & Version Control: Git, GitHub, Postman, VS Code

API Testing: Postman (CRUD validation, REST endpoint testing)

INTERNSHIP & PROFESSIONAL TRAINING

Full Stack Java Development | Coding Hub Innovations pvt ltd.

Aug 2025 – Jan 2026

- Developed RESTful APIs using **Java and Spring Boot**, handling CRUD operations and client-server communication
- Designed and executed **complex SQL queries, joins, and relational schema** in MySQL for efficient data handling:
- Built a web application using **HTML, CSS, and JavaScript**
- Tested APIs using **Postman**, validating endpoints, request/response cycles, and edge cases
- Understood Software Development Life Cycle (SDLC) and project workflow.

PROJECTS

Product Catalog REST APIs | Backend Application

Tech Stack: Java, Spring Boot, REST API, MySQL

- Engineered a Product Catalog REST API with Advanced Filtering.
- Implemented dynamic filtering:
 - Search by name,
 - Filter by category,
 - Price range filtering,
 - Rating-based filtering (greater than)
- Designed and optimized MySQL database schema with relational tables, foreign key constraints, and indexed queries for fast data retrieval.
- Tested and validated all APIs using Postman with real-time query scenarios

EDUCATION

Bachelor of Technology (B.Tech) – Computer Science and Engineering

2021 – 2025

Sri Indu Institute of Engineering and Technology | GPA: 7.21 / 10.0

Intermediate – MPC

2019 – 2021

Telangana State Model School & jr. College

SSC

2019

Telangana State Model School & jr. College

KEY ACHIEVEMENTS & STRENGTHS

- Built production-grade Backend applications demonstrating end-to-end software development lifecycle skills.
- Strong proficiency in Java multithreading, and exception handling — core competencies for backend engineering roles.
- Practical experience testing and validating REST APIs using Postman ensuring endpoint correctness and data integrity.
- Solid understanding of relational database design, complex SQL queries, joins, and constraints for enterprise data management

SOFT SKILLS

- Strong analytical and problem-solving mindset
- Effective team collaboration and communication
- Leadership experience managing a 4-member project team
